

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, September 30, 2017 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity: Light (63) new fires  
 New large incidents: 3  
 Large fires contained: 1  
 Uncontained large fires:\*\* 13  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 11

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northwest Area (PL 3)**

New fires: 3  
 New large incidents: 0  
 Uncontained large fires: 9  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 4

**Eagle Creek**, Columbia River Gorge National Scenic Area. IMT 2 (Harrod). One mile south of Cascade Locks, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

**Chetco Bar**, Rogue River - Siskiyou NF. IMT 1 (Schulte). Sixteen miles west of Selma, OR. Timber and brush. Minimal fire behavior. Road, trail and area closures in effect.

**High Cascades Complex**, (5 fires), Rogue River - Siskiyou NF. IMT 2 (Johnson). Transfer of command from IMT 2 (Roide) back to the local unit will occur today. Nine miles northeast of Prospect, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

**Jones**, Willamette NF. Transfer of command from IMT 2 (Knerr) back to the local unit will occur today. IMT is also managing the Kelsey Creek fire. Ten miles northeast of Lowell, OR. Timber and grass. Minimal fire behavior. Area closures in effect.

**Desolation**, Ochoco NF. Twenty miles northeast of Prineville, OR. Timber and brush. No new information.

**Southern Area (PL 5)**

New fires: 22  
 New large incidents: 2  
 Uncontained large fires: 0  
 Type 1 IMTs Committed: 1  
 Type 2 IMTs Committed: 6

**Hurricane Maria Puerto Rico**, Federal Emergency Management Agency (FEMA). IMT 1 (McGowan) has been tasked with scouting logistical information to include billeting, food, water and facilities. IMT 2 (Zombro) is coordinating with other agencies to plan and prioritize emergency road clearing. FDNY IMT 2 (Kane) has been tasked with assessment of damage to critical infrastructure including roads, water systems and communications.

\* **Hurricane Maria U.S Virgin Islands**, Federal Emergency Management Agency (FEMA). IMT 2 (Bird) has mobilized to St. Croix and is managing a logistical staging area for incoming responders while preparing for FEMA operations. IMT 2 (Parrish) has mobilized to St. Thomas and is supporting the receiving and distribution of emergency commodities to aid in the relief efforts.

**Hurricane Harvey**, Texas A&M Forest Service. Texas IMT 2 (Hanneman) has mobilized to College Station, TX to support recovery and mitigation efforts, surveying impacts on local fire departments and distributing donated fire equipment.

\* **Hurricane Irma Recovery – South Florida Parks**, National Park Service. IMT 2 (Foust) is overseeing site assessment, debris cleanup and emergency stabilization within national parks in Florida, Georgia and South Carolina.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Cool and wet conditions are expected across the northwestern quarter of the country as the previous day's front over the Pacific Northwest merges with the low pressure area over Montana. Widespread rain and high elevation snow is expected from the central Great Basin northward into Canada. Meanwhile, from the central Great Basin south to the Mexican Border and west through California expect warm and dry conditions with an occasionally breezy southwesterly flow. Ahead of the system across the Great Plains, expect a breezy southerly wind with scattered showers and storms developing in the afternoon. The East Coast will remain warm and dry under a weak high pressure ridge. One exception to this will be Florida where a low pressure area will form off the southeast coast and will bring rain to much of the southern half of the state.

## ATV Safety

*Vehicles/Roads Category*

### **Most injuries associated with ATVs occur when:**

- the driver loses control (When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control.)
- the vehicle rolls over
- the driver or passenger is thrown off
- the operator's loss of attention to what, where, and how an ATV is being operated
- or there is a collision with a fixed object

### **Identified contributing factors to ATV accidents include:**

- rider inexperience
- excessive speed combined with rough terrain, can create enough pitch and bounce to cause the operator to lose control of the vehicle
- lack of helmet use
- the ATV is improperly loaded or load weight exceeds vehicle operation capacity
- the operator carries a passenger that affects the operators control and operation of the ATV

### **Safety measures for ATV use include:**

- Conduct pre-ride inspection which should include checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or drive shaft, air filter, clean out of weeds and other debris from around engine and other hot components, and the chassis for any defects or wear.
- Single riders only--Injuries frequently occur to passengers, therefore riding double should not be permitted.
- Always wear PPE- helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle (not firefighting) use, and should include safety visors/face shields, goggles, or safety glasses for eye protection.
- Use headlights to improve visibility by other vehicles
- Maintain speeds acceptable for riding conditions, especially over uneven terrain
- Traversing slopes should be avoided
- Mounted or towed loads should not exceed manufacturer's recommendation and should be properly mounted so that weight transfer does not affect the center of gravity of the machine--mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
- Do not drive on public roads - Collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads—check your state's laws.
